Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials. In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

Copyright
The text and illustrations that appear here are the exclusive property of howtoplans.org and are protected by federal copyright laws. The one-time use of the plans is limited to anyone who purchases them. The duplication, publication, sale or distribution of any portion of these plans without prior written consent from the original designer will be subject to the appropriate penalties for copyright infringement.
### 8'x10' Garden Shed Material List

**Site Preparation**
- Concrete
- Bricks

**Bottom Frame**
- Pressure-Treated Lumber
- Plywood

**Wall Frames**
- Pressure-Treated Lumber

**Shed’s Roof**
- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge

**Shed’s Door**
- Pressure-Treated Lumber
- Wood siding boards
- Plywood

**Walls Exterior Siding**
- Pressure-Treated Lumber
- Wood siding boards

**Top Frame**
- Pressure-Treated Lumber

**Fasteners & Hardware**
- Door hinges
- Door pulls
- Surface bolt
- Window lock
- Wood square louver gable vent
- Galvanized nails
- Wood screws

**Shed’s Window**
- Pressure-Treated Lumber
- Window beading
- Glass

**Drainage System**
- Pressure-Treated Lumber
- Half round gutter
- End pieces with outlet
- 45° elbow
- Drainage pipe
- Joint connector
- End cap
- Round hunger
- Wall fastener

**Foundation Preparation**

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1 ft. wide and 1 ft. deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation.
Framing the Floor

2.1 Assemble the frame using 1 1/2” x 7 1/4” (2 x 8) pressure-treated lumber. You will need nine boards cut to 9’-10 1/2” for the floor joists.

2.2 Secure the beams with 8x5” wood screws.

2.3 Using a square, measure the outside corner angles to verify that they are 90°.
Assemble Front Wall Frame

3.1 Using 1 1/2” x 3 1/2” (2 x 4) and 3 1/2” x 3 1/2” (4 x 4) pressure-treated lumber, construct front wall frame using the drawing below. You will need three boards cut to 11” that will be the cripple studs, one board cut to 5'-4” that will be the door header and eight boards cut to 6'-11” that will be the wall studs.

3.2 Connect the beams with 9x2 1/2 Phillips flat head wood screws.

3.3 Using a square, check the corners to ascertain each is 90°.
Assemble Back Wall Frame

4.1 Using 2x4 and 4 x 4” pressure-treated lumber, construct back wall frame using the drawing provided below. You will need ten boards cut to 6’-11” that will be the studs and two boards (4x4s) cut to 10’ that will be the top and bottom plates.

4.2 Connect the beams with 2x4” flat head Phillips wood screws.

4.3 Using your square, check each corner to verify that it is 90°.
Assemble Left and Right Wall Frames

5.1 Using 1 1/2" x 3 1/2" pressure-treated lumber, construct side wall frames using the figure below as a guide.
You will need four boards cut to 5 1/2" that will be the cripple studs, four boards cut to 2'-10 1/2" that will be the studs, two boards cut to 3'-4" that will be the window header and rough sill, eight boards cut to 6'-11" that will be the wall studs and two 2 x 4 boards cut to 9'-5" that will be the top and bottom plates.

5.2 Connect the beams with 2x4" flat head Phillips wood screws.

5.3 Use the square to check the corners to make sure they are each 90°.
Assemble the Roof Frame

6.1 Using 1 1/2 “ x 5 1/2 “ pressure-treated lumber, cut eighteen rafters 6'-11" long according to the dimensions.

6.2 Using 1 1/2 “ x 3 1/2 “ pressure-treated lumber, cut seven collar ties 5'-11 3/4" long according to the sizes shown.

6.3 Using 3/4 “ x 7 1/4 “ pressure-treated board, cut the ridge board 10’ long according to the drawing just below.

6.4 Connect the beams with 2x3” Phillips flat head wood screws.
**Roof Sheathing Installation**

7.1 You will need 150 Sq Ft of asphalt shingle roofing.

7.2 Add the metal flashing to the fascias

7.3 Cover the plywood with roofing underlayment.

7.4 Install asphalt shingle roofing using a heavy duty staple gun or hammer and roofing nails.
Assemble and Install Window Shutters

This elevation requires 4 window shutters.

8.1 Assemble frames using 3/4” x 1 1/2” pressure-treated lumber and secure with 3” wood screws. You will need one board cut to 1'-4 3/4" two boards cut to 3'-3/4" that will be the vertical pieces and two boards cut to 1'-7 3/4" that will be the horizontal pieces.

8.2 Mill a recess along the vertical girts for the jalousies.

8.3 Use 1 1/4” x 1 1/2” pressure-treated lumber for the jalousies.

You will need twenty two boards cut to 1'-5 3/4”.

8.4 Install two 3” door hinges using 6x1” wood screws.
Assemble and Install Pergolas

Prepare two pergolas.

9.1 Assemble front frame using 1 1/2 “ x 1 1/2 ” pressure-treated lumber and secure with 3” flat head wood screws. You will need two boards cut to 6'-7” that will be the vertical lengths and two boards cut to 11” that will be the horizontal pieces.

9.2 Assemble back frame using 3/4” x 2 1/2 ” pressure-treated lumber and secure with 5” flat head Phillips wood screws. You will need two boards cut to 6'-7” that will be the vertical lengths and two boards cut to 9” that will be the horizontal pieces.

9.3 Use 3/4 “ x 3/4 “ pressure-treated lumber for the lattice. You will need thirty six pieces cut to 1'-3 1/2”. Assemble according to the drawing.
Assemble and Install Roof Drainage System

10.1 Assemble roof drainage system on the front fascia board. You will need 5" gutter 8' long, two end pieces with the outlet, six 45° elbows, two 3" pipes 6' long, two joint connectors and two end caps.

10.2 Fasten the gutter to the fascia with the round hungers.

10.3 Fasten the vertical pipe section with the four wall fasteners.
Assemble and Install Door Ramp

11.1 Assemble the five door ramp frames from pressure-treated lumber and secure with 3 and 5” wood screws. For each frame you will need one 1 1/2" x 1 1/2" board cut to 1'-8”; one 1 1/2" x 2 1/2" board cut to 3'-3/4" and one 1 1/2" x 3 1/2" board cut to 6 1/4”.

11.2 Connect and secure all frames using one 1 1/2" x 2 1/2" board 5'-9" long and 3” wood screws.

11.3 Cut the 9/16" plywood sheet with dimensions 3'-3/4" x 5'-9" for the top plate and two sheets cut to 9 1/4" x 2'-9 1/2" for the sides.

11.4 Assemble siding shields with 2” galvanized nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
