Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials.
In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

Copyright
The text and illustrations that appear here are the exclusive property of howtoplans.org and are protected by federal copyright laws. The one-time use of the plans is limited to anyone who purchases them. The duplication, publication, sale or distribution of any portion of these plans without prior written consent from the original designer will be subject to the appropriate penalties for copyright infringement.

Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1 ft. wide and 1 ft. deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation.
**Framing the Floor**

2.1 Make the floor frame using 1 1/2” x 7 1/4” treated lumber. You will need eight boards cut to 9'-9” for the floor joists.

2.2 Fasten the beams together with 8x5” wood screws.

2.3 Verify that each corner is 90°. If the floor isn't square, there will be problems throughout.
Assemble Front Wall Frame

3.1 Build the front wall frame using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” treated lumber, using the illustration as a reference. Cut three boards cut to 10 1/4” for the cripple studs, one board cut to 5’-4” for the door header, ten boards cut to 6’-11 3/4” for the studs and two boards cut to 12’ for the top and bottom plates.

3.2 Attach the beams with 2x4” flat head Phillips wood screws.

3.3 Check the corners to make sure they are 90°.
Assemble Back Wall Frame

4.1 Use 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" lumber to build the back wall frame. Cut 10 boards from the 2 x 4s for the studs and two boards cut to 12' for the top and bottom plates, using the drawing below as a guide.

4.2 Use 2x4" flat head Phillips wood screws to attach the parts.

4.3 Check every corner with a square to make sure each is 90°.
Assemble Left and Right Wall Frames

5.1 Build the side wall frames using 1 1/2" x 3 1/2" treated lumber. You'll need nine boards cut to 6'-11 3/4" for the wall studs, and two boards cut to 9'-5" for the top and bottom plates.

5.2 Use 2x4" Phillips flat head wood screws to join the parts.

5.3 Be sure to check each of the corners to make sure they are 90°.
Assemble the Roof Frame

6.1 Cut 16 rafters 7'-1/2" long using 1 1/2" x 5 1/2" treated lumber dimensions according to the measurements.

6.2 Use 1 1/2 “ x 3 1/2 “ pressure-treated lumber to cut six collar ties 5'-11 3/4" long.

6.3 Using 3/4 “ x 7 1/4 “ pressure-treated board, Cut the ridge board 12' long using 3/4” x 7 1/4” lumber by following the illustration below.

6.4 Connect the beams with 2x3” Phillips flat head wood screws.
Install Plywood for the Roof

7.1 Cut sheets of 9/16” plywood for the roof sheathing using the drawing below as a guide. You will need two 2'-11 1/4" x 5'-1" sheets, two 4' x 5'-1" sheets and four 4' x 6'-11 1/4" sheets.

7.2 Secure the plywood with 2" flat head Phillips flat head wood screws.
Assemble and Install Shed Doors

8.1 Build the door frames for the shed using 1 1/2 “ x 3 1/2 “ treated lumber and secure with 5” Phillips flat head wood screws. You will need two boards cut to 5’-11 3/4” for the vertical girts and two boards cut to 2’-3/4” that for the horizontal girts.

8.2 Cut the 9/16” plywood sheet into two pieces that measure 2’-7 3/4” x 5’-11 3/4” for the doors according to the drawing.

8.3 Use 2 1/2 “ x 3/4 “ treated lumber for the door trim and fasten with 2” flat head Phillips wood screws. You will need two boards cut to 2’-2 3/4” and two boards cut to 5’-11 3/4”.

8.4 Using 1/4 “ x 3/4 “ treated lumber, cut them to 2’-2 3/4” long.

8.5 Use 1/2 “ x 6” wood siding boards for the exterior siding on the door. Review the reference below as a guide.

8.6 Install the siding shields with 2” galvanized nails.

8.7 Add three 3” door hinges using 6x1” wood screws. Finish hanging the doors by attaching 4” surface bolts and adding 6” door pulls.
Roof Sheathing Installation

9.1 You will need 185 square feet of asphalt shingle roofing of your choice.

9.2 Add the metal drip edge to the fascias

9.3 Cover the plywood with roofing paper.

9.4 Install the shingles using an industrial stapler or hammer and roofing nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
