Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials.
In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

Copyright

- Plywood
Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1’ wide and 1’ deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 175 bricks for this step.
**Framing the Floor**

2.1 Use 1 1/2” x 7 1/4” pressure-treated lumber to make the frame for the floor. You will need 11 boards cut to 9'-9” for the floor joists.

2.2 Use 8x5” wood screws to fasten the joists to the frame.

2.3 Be sure to check the corners to make sure they are 90° after you’ve attached the joists.
Assemble Front Wall Frame

3.1 Build the front wall frame using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" treated lumber, using the drawing below as a reference. You will need three boards cut to 11" for the cripple studs; one board cut to 5'-4" for the door header; twelve boards cut to 6'-11" for the wall studs; two boards cut to 4'-4" to use as the bottom plates; and one board cut to 14' that will be the top plate.

3.2 Connect the beams with 2x4" Phillips flat head wood screws.

3.3 Check every corner to make sure each is 90°.
Assemble Back Wall Frame

4.1 Construct the back wall frame using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” treated lumber using the drawing below as a reference. You will need 11 boards cut to 6’-11” that to use as the wall studs and two boards cut to 14’ that for the top and bottom plates.

4.2 Join all the beams with 2x4” Phillips flat head wood screws.

4.3 Use a square of your choice to check the corners to make sure they are 90°.
Assemble Left and Right Wall Frames

5.1 Using 1 1/2” x 3 1/2” pressure-treated lumber, make the side wall frames using the drawing below as a guide. Cut four boards to 5 1/2” to use as the cripple studs; cut four boards cut to 2'-10 1/2” for the wall studs; cut two boards cut to 3'-4” for the window header and rough sill; eight boards cut to 6'-11” for the wall studs and two boards cut to 9'-5” to use as the top and bottom plates.

5.2 Assemble the parts with 2x4” Phillips flat head wood screws.

5.3 Check the corners to make sure they are 90° using the square of your choice.
Assemble the Roof Frame

6.1 Cut twenty rafters 6’-11” long with 1 1/2 “ x 5 1/2 “ pressure-treated lumber, according to the dimensions.

6.2 Using 1 1/2 “ x 3 1/2 “ treated lumber, cut eight collar ties 5’-11 3/4” long based on the dimensions.

6.3 Cut the ridge board to 14’ long using 3/4 “ x 7 1/4 “ pressure-treated board as shown in the illustration below.

6.4 Fasten the beams together with 2x3” flat head Phillips wood screws.
Roof Sheathing Installation

7.1 You will need 210 square feet of asphalt shingle roofing.

7.2 Add the metal drip edges to the fascias.

7.3 Cover the plywood with roofing felt, paper or building paper.

7.4 Use a heavy duty stapler or hammer and roofing nails to install the shingles.
Assemble and Install Window Shutters

This panel uses four shutters to frame the two windows.

8.1 Make the shutter frames using 3/4 “ x 1 1/2 “ treated lumber and secure with 3” Phillips wood screws. You will need one board cut to 1’-4 3/4" two boards cut to 3’-3/4” for the vertical girts and two boards cut to 1’-7 3/4” for the horizontal girts.

8.2 Mill a recess along the vertical girts for the slats.

8.3 Use 1/4 “ x 1 1/2 “ treated lumber for the 22 slats cut to 1’-5 3/4”.

8.4 Install two 3” door hinges using 6x1” wood screws.
Assemble and Install Pergolas

This plan uses prepare pergola-style shutters that hang on each side of the door.

9.1 Assemble front frame using 1 1/2 “ x 1 1/2 “ treated lumber and attach with 3” Phillips wood screws. You will need two boards cut to 6'-7" for the vertical girts and two boards cut to 1'-5 1/2" to use as the horizontal girts.

9.2 Assemble back frame using 3/4” x 2 1/2 “ treated lumber and secure with 5” Phillips wood screws. You will need two boards cut to 6'-7" to use as the vertical girts and two boards cut to 1'-3 1/2" for the horizontal girts.

9.3 Use 3/4 “ x 3/4 “ pressure-treated lumber for the lattice. You will need 36 boards cut to 2'-3/4". Assemble according to the drawing.
Assemble and Install Roof Drainage System

10.1 Assemble the gutter drainage system on the front fascia board. You will need 5” half round gutter 12’-7” long; two end pieces with the outlet; six 45° elbows, two 3” pipes 6’ long; two joint connectors and two end caps.

10.2 Fasten the round gutter to the fascia with the round hangers.

10.3 Fasten the vertical pipe sections with the four wall fasteners at even intervals.
Assemble and Install Door Ramp

11.1 Make the five door ramp frames from treated lumber and secure with 3x5” flat head Phillips wood screws. For each frame you will need one 1 1/2” x 1 1/2” board cut to 1'-8”; one 1 1/2” x 2 1/2” board cut to 3'-3/4”; and one 1 1/2” x 3 1/2” board cut to 6 1/4”.

11.2 Secure all the frames using one 1 1/2” x 2 1/2” board 5'-9” long and 3” Phillips wood screws.

11.3 Cut the 9/16” plywood sheet to 3'-3/4” x 5'-9” for the top plane and two sheets to 9 1/4” x 2'-9 1/2” for the sides.

11.4 Assemble siding shields with 2” galvanized nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
