Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials. In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

The one-time use of the plans is limited to anyone who purchases them. The duplication, publication, sale or distribution of any portion of these plans without prior written consent from the original designer will be subject to the appropriate penalties for copyright infringement.
# 10'x16' Garden Shed Material List

## Site Preparation
- Concrete
- Bricks

## Bottom Frame
- Pressure-Treated Lumber
- Plywood

## Wall Frames
- Pressure-Treated Lumber

## Shed’s Door
- Pressure-Treated Lumber
- Wood siding boards
- Plywood

## Walls Exterior Siding
- Pressure-Treated Lumber
- Wood siding boards

## Top Frame
- Pressure-Treated Lumber

## Fasteners & Hardware
- Door hinges
- Door pulls
- Surface bolt
- Window lock
- Wood square louver gable vent
- Galvanized nails
- Wood screws

## Shed’s Roof
- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge

## Shed’s Window
- Pressure-Treated Lumber
- Window beading
- Glass

## Drainage System
- Pressure-Treated Lumber
- Half round gutter
- End pieces with outlet
- 45° elbow
- Drainage pipe
- Joint connector
- End cap
- Round hunger
- Wall fastener

Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1' wide and 1' deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 200 bricks for this step.
Framing the Floor

2.1 Assemble the frame using 1 1/2” x 7 1/4” pressure-treated lumber. You will need 12 boards cut to 9'-9” that will be the joists.

2.2 Secure the beams with 8x5” wood screws.

2.3 Using a speed or carpenter’s square, check the corners to make sure they are 90°.
Assemble Front Wall Frame

3.1 Using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" pressure-treated lumber, construct the front wall frame using the drawing below as a guide.

You will need three boards cut to 11" that will be the cripple studs; One board cut to 5'-4" that will be the door header; Fourteen boards cut to 6'-11" that will be the studs; Two boards cut to 5'-4" for the bottom plates; and One board cut to 16' for the top plate.

3.2 Join the beams with 2x4" flat head Phillips wood screws.

3.3 Using a square, check the corners to make sure they all are 90°.

Assemble Back Wall Frame

4.1 Using 1 1/2” x 3 1/2“ and 3 1/2“ x 3 1/2“ pressure-treated lumber, build the back wall frame for the garden shed using the drawing below as an example. You will need 14 boards cut to 6’-11” for the vertical studs and two boards cut to 16’ for the top and bottom plates.

4.2 Assemble the beams together with 2x4” Phillips flat head wood screws.

4.3 Using the square of your choice, check the corners to verify that they are 90°.
Assemble Left and Right Wall Frames

5.1 Using 1 1/2” x 3 1/2” pressure-treated lumber, construct side wall frames using the drawing below as a reference.
You will need four boards cut to 5 1/2” that will be the cripple studs;
Four boards cut to 2’-10 1/2” that will be the studs;
Two boards cut to 3’-4” that will be the window header and rough sill,
Eight boards cut to 6’-11” that will be the studs; and
Two boards cut to 9’-5” that will be the top and bottom plates.

5.2 Connect the beams with 2x4” Phillips flat head wood screws.

5.3 Using a square, verify that all the corners are 90°.
Assemble the Roof Frame

6.1 Using 1 1/2 “ x 5 1/2 “ pressure-treated lumber, cut 28 rafters 6'-11” long according to the dimensions shown.

6.2 Using 1 1/2 “ x 3 1/2 “ pressure-treated lumber, cut 12 collar ties 5'-11 3/4” long according to the sizes shown.

6.3 Using 3/4 “ x 7 1/4 “ pressure-treated board, cut the ridge board 16’ long as shown below.

6.4 Join the beams with 2x3” Phillips flat head wood screws.
Install Plywood for the Roof

7.1 Cut sheets of 9/16” plywood for the roof decking using the drawing below as a layout guide. You will need two 4’ x 6'-11” sheets, six 3’-8” x 6'-11” sheets and two 1’-6 3/4” x 6'-11” sheets for this storage shed roof.

7.2 Secure the plywood with 2” Phillips flat head wood screws.
Assemble and Install Shed Doors

8.1 Build the door frames for the shed using 1 1/2 “ x 3 1/2 “ pressure-treated lumber and secure with 5” flat head Phillips wood screws. Cut two boards to 5'-11 3/4” that will be the vertical girts and two boards cut to 2'-3/4” for the horizontal girts.

8.2 Cut the 9/16” plywood sheet into two 2'-7 3/4” x 5'-11 3/4” sections for the doors according to the drawing for the garden shed.

8.3 Use 2 1/2 “ x 3/4 “ pressure-treated lumber for the door trim and fasten with 2” flat head wood screws. You will need two boards cut to 2'-2 3/4” and two boards cut to 5'-11 3/4” for the trim.

8.4 Using 1/4 “ x 3/4 “ pressure-treated lumber, cut and install a starter course 2'-2 3/4” long.

8.5 Use 1/2 “ x 6” wood siding boards for the door and use the illustration below as a reference.

8.6 Assemble the siding shields with 2” galvanized nails.

8.7 Install three 3” door hinges and fasten to the shed’s door frame using 6x1” wood screws. Finish the door installation by attaching 4” surface bolts and 6” door pulls.
Roof Sheathing Installation

9.1 You will need 235 Sq Ft of asphalt shingle roofing using the color and quality of your choice.

9.2 Add the metal drip edge to the fascias.

9.3 Cover the plywood with roofing paper (roofing felt).

9.4 Install asphalt shingle roofing using an industrial stapler or hammer using roofing nails.
Window Installation for Left and Right Walls

This garden shed requires two windows whose instructions are in this section.

10.1 Using 1 1/2 “ x 2 1/2 “ pressure-treated lumber, put together the outer frame for the window as shown in the illustration below. You will need two boards cut to 3’-1” that will be the vertical pieces and two boards cut to 3’-4” that will be the horizontal pieces. Additionally, add vertical 2’-11 1/2” long and horizontal 3’-1” long supports using 3/4” x 1” boards and cut the recesses for the window hinges.

10.2 Use 1 1/2 “ x 1 1/2 “ pressure-treated material to make the inner frame and secure with 3” flat head wood screws. You will need two boards cut to 2’-9 3/4” that will be the vertical lengths and two boards cut to 3’-3/4” that will be the horizontal widths. Cut a groove for the glass panes and for the hinges as shown.

10.3 Use 1 1/4 “ x 1 1/2 “ pressure-treated material to make the inner frame supports and secure with 3” wood screws. You will need two boards cut to 2’-9 3/4” and mill a recess for interconnection.

10.4 Prepare and install glass into inner frame groove and fasten it with window glaze beading on four sides. Use 1/2” galvanized nails.

10.5 Install two hinges (3” with 6x1” flat head wood screws) and assemble the window. Install a lock on the inner side of the window.
Assemble and Install Window Shutters

This garden shed plan requires four window shutters.

11.1 Assemble frames using 3/4 “ x 1 1/2 “ pressure-treated lumber and secure with 3” flat head wood screws. You will need one board cut to 1'-4 3/4”, two boards cut to 3'-3/4” for the vertical girts and two boards cut to 1'-7 3/4” for the horizontal girts.

11.2 Mill a recess along the vertical girts for the slats.

11.3 Use 1/4 “ x 1 1/2 “ pressure-treated lumber for the shutter slats. You will need 22 boards cut to 1'-5 3/4”.

11.4 Install two 3” door hinges using 6x1” wood screws.
Assemble and Install Pergolas

This plan requires four pergolas.

12.1 Put together the frame using 1 1/2 “ x 1 1/2 “ pressure-treated lumber and secure with 3” Phillips wood screws. You will need two boards cut to 6’-7” that will be the vertical girts and two boards cut to 1’-5 1/2” for the horizontal girts.

12.2 Assemble the back frame using 3/4” x 2 1/2 ” pressure-treated lumber and secure with 5” Phillips wood screws. You will need two boards cut to 6’-7” that will be the vertical girts and two boards cut to 1’-3 1/2” for the horizontal girts.

12.3 Use 3/4 “ x 3/4 “ pressure-treated lumber for the lattice. You will need thirty six boards cut to 2’-3/4”. Assemble according to the drawing.
Assemble and Install Roof Drainage System

13.1 Assemble roof gutters on the front fascia board. You will need 5" half round gutter 14'-7" long, two end pieces with the outlet, six 45° elbows, two 3" pipes 6' long, two joint connectors and two end caps.

13.2 Fasten the round gutter to the fascia with the nine round hangers.

13.3 Fasten the vertical pipe section evenly along the wall with the four wall fasteners.
Assemble and Install Door Ramp

14.1 Assemble the five door ramp frames from treated lumber and secure with 3 x 5” Phillips wood screws. For each frame you will need one 1 1/2” x 1 1/2” board cut to 1'-8”; One 1 1/2” x 2 1/2” board cut to 3'-3/4”; and One 1 1/2” x 3 1/2” board cut to 6 1/4”.

14.2 Connect and secure the frames using one 1 1/2” x 2 1/2” board 5'-9” long and 3” wood screws.

14.3 Cut the 9/16” plywood sheet with dimensions 3'-3/4” x 5'-9” for the top piece and two sheets with dimensions 9 1/4” x 2'-9 1/2” for the sides.

14.4 Put the siding shields together with 2” galvanized nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
