BUY PREMIUM PLAN

**Disclaimer**

The information provided here will show you how to build a shed. However, howtoplans.org does not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials.

In addition to the selection of the materials, the customer will be responsible for such construction tasks as caulking, flashing, gluing, insulating, and nailing, and for adequate workmanship in the areas of installation, roofing and weatherproofing, as well as for any other skills that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

**The Responsibility of Users**

Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

**Liability**

Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should use only quality materials and should always follow good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed in accordance with the highest standards.

**Permissions**

It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

**Copyright**

</table>

**Bottom Frame**

- Pressure-Treated Lumber
- Plywood

**Front/Back/Side Wall Exterior Siding**

- Pressure-Treated Lumber
- Wood siding boards

**Front/Back/Side Wall Frames**

- Pressure-Treated Lumber

**Top Frame**

- Pressure-Treated Lumber

**Shed’s Roof**

- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge

**Fasteners & Hardware**

- Door hinges
- Door pulls
- Surface bolt
- Corner braces
- Wood square louver gable vent
- Galvanized nails
- Wood screws

**Door Ramp**

- Pressure-Treated Lumber
- Plywood
**Foundation Preparation**

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1' wide and 1' deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 225 bricks for this step.
**STEP 2**

**Framing the Floor**

2.1 Assemble the frame using 1 1/2" x 7 1/4" pressure-treated lumber. You will need two boards cut to 16' that will be the rim joist and two boards cut to 11'-9" that will be the joist.

2.2 Secure the beams with 8x5" wood screws.

2.3 Using a speed square or carpenter’s square, check the corners to make sure they are 90°.
STEP 3

Assemble Front Wall Frame

3.1 Using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" pressure-treated lumber, construct front wall frame using the drawing below as a reference. You will need ten boards cut to 7'-3" that will be studs, two boards cut to 5'-4" that will be the bottom plates, one board cut to 16' that will be the top plate, one board cut to 5'-4" that will be the door header, three boards cut to 1'-1" that will be cripple studs.

3.2 Connect the beams with 2x3" and 2x5"wood screws.

3.3 Using a speed square or carpenter's square, check the corners to make sure they are 90°.
Assemble Back Wall Frame

4.1 Using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" pressure-treated lumber, construct back wall frame using the drawing below as a reference. You will need thirteen boards cut to 8'-3" that will be the studs and two boards cut to 16' that will be the top and bottom plates.

4.2 Connect the beams with 2x3" wood screws.

4.3 Using a speed square or carpenter's square, check the corners to make sure they are 90°.
STEP 5

Assemble Right and Left Wall Frames

5.1 Using 1 1/2" x 3 1/2" pressure-treated lumber, construct side wall frame using the drawing below as a reference. You will need ten boards cut to 7'-3" that will be the studs and two boards cut to 11'-5" that will be the top and bottom plates.

5.2 Connect the beams with 2x3" wood screws.

5.3 Using a speed square or carpenter's square, check the corners to make sure they are 90°.
Assemble The Roof Frame

6.1 Using 1 1/2" x 5 1/2" pressure-treated lumber, cut thirteen rafters 13'-3 1/4" long according to the dimensions in drawing below. Cut the recesses in each beam for splicing connection with wall frames.

6.2 Connect the beams with a top frame with the help of 3" wood screws.
Assemble and Install Shed Doors

7.1 Build the door frames for the shed using 1 1/2" x 3 1/2" pressure-treated lumber and secure with 5" wood screws. You will need two boards cut to 5'-11 3/4" that will be the vertical girts and two boards cut to 2'-3/4" that will be the horizontal girts.

7.2 Prepare the 9/16" plywood sheet with dimensions 2'-7 3/4" x 5'-11 3/4" for the doors according to the drawing.

7.3 Use 2 1/2" x 3/4" pressure-treated lumber for the door trim and fasten with 2" wood screws. You will need two boards cut to 2'-2 3/4" and two boards cut to 5'-11 3/4".

7.4 Using 1/4" x 3/4" pressure-treated lumber, cut and install a starter course 2'-2 3/4" long.

7.5 For the exterior siding on the door, use 1/2" x 6" wood siding boards and the illustration below as a reference.

7.6 Assemble siding shields with 2" galvanized nails.

7.7 Install three 3" door hinges using 6x1" wood screws. Finish the doors installation by attaching 4" surface bolts and 6" door pulls.
**STEP 8**

**Roof Sheathing Installation**

**8.1** You will need 235 Sq Ft of asphalt shingle roofing.

**8.2** Add the metal drip edge to the fascias.

**8.3** Cover the plywood with building paper.

**8.4** Install asphalt shingle roofing using an industrial stapler.
Assemble and Install Door Ramp

9.1 Assemble the five door ramp frames from pressure-treated lumber and secure with 3" and 5" wood screws (node K on page 28). For each frame you will need one 1 1/2" x 1 1/2" board cut to 1'-8"; one 1 1/2" x 2 1/2" board cut to 3'-3/4" and one 1 1/2" x 3 1/2" board cut to 6 1/4".

9.2 Connect and secure all frames using one 1 1/2" x 2 1/2" board 5'-9" long and 3" wood screws.

9.3 Cut the 9/16" plywood sheet with dimensions 3'-3/4" x 5'-9" for the top plane and two sheets with dimensions 9 1/4" x 2'-9 1/2" for the sides.

9.4 Assemble siding shields with 2" galvanized nails.
Shed Decoration

Now that your shed is all done, you are ready to decorate it any way you want using your favourite paint, stain, or preservative.
