Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials. In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

The one-time use of the plans is limited to anyone who purchases them. The duplication, publication, sale or distribution of any portion of these plans without prior written consent from the original designer will be subject to the appropriate penalties for copyright infringement.
# 8'x10' Garden Shed Material List

## Site Preparation
- Concrete
- Bricks

## Bottom Frame
- Pressure-Treated Lumber
- Plywood

## Shed's Door
- Pressure-Treated Lumber
- Wood siding boards
- Plywood

## Wall Frames
- Pressure-Treated Lumber

## Walls Exterior Siding
- Pressure-Treated Lumber
- Wood siding boards

## Top Frame
- Pressure-Treated Lumber

## Shed's Roof
- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge
- Building paper
- Asphalt shingles
- Metal drip edge

## Fasteners & Hardware
- Door hinges
- Door pulls
- Surface bolt
- Window lock
- Wood square louver gable vent
- Galvanized nails
- Wood screws

## Shed's Window
- Pressure-Treated Lumber
- Window beading
- Glass

## Drainage System
- Pressure-Treated Lumber
- Half round gutter
- End pieces with outlet
- 45° elbow
- Drainage pipe
- Joint connector
- End cap
- Round hunger
- Wall fastener
Shed's Window Shutter

- Pressure-Treated Lumber

Shed's Pergola

- Pressure-Treated Lumber

Door Ramp

- Pressure-Treated Lumber
- Plywood

Wall Sheathing

- Plywood
Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1' wide and 1' deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 120 bricks for this step.
**Framing the Floor**

2.1 Use 1 1/2” x 7 1/4” pressure-treated lumber to assemble the floor frame. You will need eight boards cut to 7'-9” to use as the joists.

2.2 Use 8x5” wood screws to assemble the frame and joists.

2.3 Make sure that all the corners are 90°.
Assemble Front Wall Frame

3.1 Construct the front wall frame using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" pressure-treated lumber. Use the drawing below as a reference. You will need three boards cut to 11" to use as the cripple studs, one board cut to 5'-4" for the door header, eight boards cut to 6'-11" for the wall studs, two boards cut to 2'-4" to use as the bottom plates and one board cut to 10' for the top plate.

3.2 Join the beams with 2x4" Phillips flat head wood screws.

3.3 Make sure that all the corners measure 90°.
Assemble Back Wall Frame

4.1 Build the back wall frame using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” pressure-treated lumber, using the drawing below as a reference. You will need nine boards cut to 6’-11” for the wall studs and two boards cut to 10’ to use as the top and bottom plates.

4.2 Screw the beams together with 2x4” Phillips flat head wood screws.

4.3 Use a square to make sure that the corners are 90°.
Assemble Left and Right Wall Frames

5.1 Using 1 1/2" x 3 1/2" treated lumber, construct the side wall frames using the drawing below as a reference. You will need four boards cut to 5 1/2" for the cripple studs; four boards cut to 2'-10 1/2" for the studs; two boards cut to 3'-4" to use as the window header and rough sill; six boards cut to 6'-11" that will be the studs and two boards cut to 7'-5" that will be the top and bottom plates.

5.2 Attach the beams together with 2x4" flat head Phillips wood screws.

5.3 Check the corners to make sure they are 90°.
Assemble the Roof Frame

6.1 Cut eighteen rafters 5’-10 1/4” long using 1 1/2 “ x 5 1/2 “ treated lumber, according to the measurements.

6.2 Cut seven collar ties 5’-11 3/4” using 1 1/2 “ x 3 1/2 “ treated lumber, as shown.

6.3 Cut the ridge board 10’ long using 3/4 “ x 7 1/4 “ treated board, according to the illustration below.

6.4 Connect the beams with 2x3” Phillips flat head wood screws.
Assemble and Install Shed Doors

**7.1** Build the door frames for the shed using 1 1/2 “ x 3 1/2 “ treated lumber and secure with 5” Phillips flat head wood screws. You will need two boards cut to 5'-11 3/4” for the vertical girts and two boards cut to 2'-3/4” for the horizontal girts.

**7.2** Cut the doors into pieces that measure 2'-7 3/4” x 5'-11 3/4” with a 9/16” sheet of plywood using the drawing.

**7.3** Use 2 1/2 “ x 3/4 “ treated lumber for the door trim and fasten with 2” Phillips flat head wood screws. You will need two boards cut to 2'-2 3/4” and two boards cut to 5'-11 3/4”.

**7.4** Using 1/4 “ x 3/4 “ treated lumber, cut and install a starter course 2'-2 3/4” long.

**7.5** Use 1/2 “ x 6” wood siding boards to cover the doors by following the illustration below.

**7.6** Assemble siding shields with 2” galvanized nails.

**7.7** Install three 3” door hinges using 6x1” flat head wood screws. Finish the door installation by attaching 4” surface bolts and 6” door pulls.
Roof Sheathing Installation

8.1 The roof needs 130 square feet of asphalt shingle roofing.

8.2 Add the metal drip edge to the fascias.

8.3 Cover the plywood with roofing or building paper.

8.4 Attach the asphalt shingle roofing using an industrial stapler or a hammer and roofing nails.
Window Installation for Left and Right Walls

This plan uses two hand-crafted windows.

9.1 Using 1 1/2 “ x 2 1/2 “ treated lumber, assemble the outside frame for the window as shown in the drawing below. You will need two boards cut to 3'-1” for the vertical girts and two boards cut to 3'-4” for the horizontal girts. Additionally, add vertical 2'-11 1/2" long and horizontal 3'-1" long supports using 3/4” x 1” lumber and cut the indents for the window hinges.

9.2 Use 1 1/2 “ x 1 1/2 “ treated wood to make the inner frame and secure with 3” Phillips flat head wood screws. You will need two boards cut to 2'-9 3/4” to use as the vertical girts and two boards cut to 3'-3/4” for the horizontal girts. Mill a recess for the glass panes and for the hinges.

9.3 Use 1 1/4 “ x 1 1/2 “ pressure-treated wood to make the inner frame supports and secure with 3” flat head wood screws. You will need two boards cut to 2'-9 3/4” and a recess milled for interconnection.

9.4 Prepare and install glass into the inner frame groove and fasten it with window beading on all four sides. Use 1/2” brads.

9.5 Install two hinges (3”) with 6x1” wood screws and assemble the window. Install a lock on the inner side of the window.
Assemble and Install Window Shutters

Prepare four window shutters.

10.1 Make the frames using 3/4" x 1 1/2" treated lumber and secure with 3" flat head wood screws. Cut one board cut to 1'-4 3/4", two boards to 3'-3/4" for the vertical girts and two boards cut to 1'-7 3/4" for the horizontal girts.

10.2 Mill a recess along the vertical girts for the slats.

10.3 Use 1/4" x 1 1/2" pressure-treated lumber for the slats. You will need twenty two boards cut to 1'-5 3/4".

10.4 Install two 3" door hinges using 6x1" wood screws.
Assemble and Install Pergolas

This plan requires two pergolas.

11.1 Make the front frame from 1 1/2 “ x 1 1/2 “ treated lumber and secure with 3” Phillips wood screws. Cut two boards to 6‘-7” for the vertical girts and two boards cut to 11” for the horizontal girts.

11.2 Assemble back frame using 3/4” x 2 1/2 “ treated lumber and secure with 5” Phillips wood screws. You will need two boards cut to 6‘-7” to use as the vertical girts and two boards cut to 9” for the horizontal girts.

11.3 Use 3/4 “ x 3/4 “ pressure-treated lumber to make the lattice. You will need 34 boards cut to 1‘-3 1/2”. Assemble according to the drawing.
**STEP 12**

**Assemble and Install Roof Drainage System**

12.1 Hang the roof drainage system on the front fascia board. You will need 5" half round gutter 8' long, two end pieces with the outlet, six 45° elbows, two 3" pipes 6' long, two joint connectors and two end caps.

12.2 Fasten the round gutter to the fascia with the six round hangers.

12.3 Fasten the vertical pipe section with the four wall fasteners spaced symmetrically on the wall.
**Assemble and Install Door Ramp**

13.1 Make five door ramp frames from treated lumber and secure with 3" and 5” Phillips wood screws. For each frame you will need one 1 1/2" x 1 1/2" board cut to 1'-8"; one 1 1/2" x 2 1/2" board cut to 3'-3/4" and one 1 1/2" x 3 1/2" board cut to 6 1/4".

13.2 Connect all frames using one 1 1/2" x 2 1/2" board 5'-9” long and 3” Phillips wood screws.

13.3 Cut the 9/16" plywood sheet to 3'-3/4" x 5'-9” for the top plane and two sheets to 9 1/4" x 2'-9 1/2” for the sides.

13.4 Assemble siding shields with 2” galvanized nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
