Disclaimer
The information provided here will show you how to build a chicken coop. However, we at howtoplans.org do not claim that the recommended techniques are the only way to accomplish this task. It will be the responsibility of each customer to ensure the application of the correct construction methods and the use of the proper materials.
In addition to the selection of the materials, the customer will be responsible for such construction issues as caulking, flashing, gluing, insulating and nailing, for ensuring adequate workmanship in the areas of installation, roofing and weatherproofing, and for any other items that are beyond the control of the designer. The materials mentioned in the plans do not represent an endorsement or recommendation of any particular product.

The Responsibility of Users
Despite our commitment to presenting accurate information, howtoplans.org is not liable for any errors or omissions appearing in the plans. Furthermore, howtoplans.org will not be liable for any consequential, special, incidental or indirect damages resulting from the use of this information. Our freedom from liability also extends to such issues as the loss of anticipated profits or business opportunities, and economic losses stemming from the use of howtoplans.org, regardless of whether there has been notification of such damage.

Liability
Those who utilize the methods described on howtoplans.org will be responsible for their own actions. We are not liable for any injuries or property damage that may arise from the use of the information appearing on this website. If you decide to use these plans, you should employ only quality materials and should always adhere to good safety practices. In the event that you are unable to complete the project on your own, you should contact a certified contractor to ensure that construction is completed with the highest standards.

Permissions
It is important to understand that planning and permission issues are dependent upon local requirements. Users of these plans are responsible for complying with the appropriate statutes and regulations, and for the proper implementation of the plans or other construction information provided by howtoplans.org. The city or county office in your area should be able to provide you with the relevant information.

The one-time use of the plans is limited to anyone who purchases them. The duplication, publication, sale or distribution of any portion of these plans without prior written consent from the original designer will be subject to the appropriate penalties for copyright infringement.
# 10'x20' Garden Shed Material List

## Site Preparation
- Concrete
- Bricks

## Bottom Frame
- Pressure-Treated Lumber
- Plywood

## Walls Frames
- Pressure-Treated Lumber

## Shed's Door
- Pressure-Treated Lumber
- Wood siding boards
- Plywood

## Walls Exterior Siding
- Pressure-Treated Lumber
- Wood siding boards

## Top Frame
- Pressure-Treated Lumber

## Shed's Roof
- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge

## Fasteners & Hardware
- Door hinges
- Door pulls
- Surface bolt
- Window lock
- Wood square louver gable vent
- Galvanized nails
- Wood screws

## Shed's Window
- Pressure-Treated Lumber
- Window beading
- Glass

## Drainage System
- Pressure-Treated Lumber
- Half round gutter
- End pieces with outlet
- 45° elbow
- Drainage pipe
- Joint connector
- End cap
- Round hunger
- Wall fastener
**Shed's Window Shutter**
- Pressure-Treated Lumber

**Shed's Pergola**
- Pressure-Treated Lumber

**Door Ramp**
- Pressure-Treated Lumber
- Plywood

**Wall Sheathing**
- Plywood
Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1’ wide and 1’ deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 250 bricks for this step.
Framing the Floor

2.1 Make the frame using 1 1/2” x 7 1/4” pressure-treated lumber. You will need fourteen boards cut to 9’-9” for the floor joists.
2.2 Use 8x5” Phillips flat head wood screws to attach the beams together.
2.3 Measure the corners to make sure they are 90° for the garden shed.
3.1 Cut the 9/16" plywood to make the floor using the layout prescribed in the drawing. You will need five 4' x 8' sheets and five 4' x 2' sheets.

3.2 Attach the plywood with 2” flat head Phillips wood decking screws.
Assemble Front Wall Frame

4.1 Using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” pressure-treated lumber, construct the front wall frame using the drawing below. You will need three boards cut to 11” for the cripple studs; one board cut to 5'-4” to use as the door header; 16 boards cut to 6'-11” for the wall studs; two boards cut to 7'-4” for the bottom plates; and one board cut to 20’ that will be the top plate for this garden shed.

4.2 Connect all the beams with 2x4” flat head Phillips wood screws.

4.3 Using a speed or carpenter’s square, check the corners to make sure they are 90°.
Assemble Back Wall Frame

5.1 Using 1 1/2" x 3 1/2" and 3 1/2" x 3 1/2" treated lumber, construct the back wall frame using the drawing below to guide you. You will need 16 boards cut to 6'-11" for the wall studs and two boards cut to 20' that will be the top and bottom plates.

5.2 Join the beams for the garden shed with 2x4" wood screws.

5.3 Using a square, check the corners to make sure they are 90°.
Assemble Left and Right Wall Frames

6.1 Using 1 1/2" x 3 1/2" treated lumber, make the side wall frames using the drawing below as a visual tool.

You will need four boards cut to 5 1/2" to use as the cripple studs; four boards cut to 2'-10 1/2" that will be the studs, two boards cut to 3'-4" that will be the window header and rough sill; eight boards cut to 6'-11" that will be the wall studs; and two boards cut to 9'-5" that will be the top and bottom plates.

6.2 Assemble the parts with 2x4" Phillips flat head wood screws.

6.3 Verify that the corners are 90°.
Assemble the Roof Frame

7.1 Using 1 1/2 “ x 5 1/2 “ pressure-treated lumber, cut 34 pieces to 6’-11” long that will form the rafters according to the dimensions.

7.2 Using 1 1/2 “ x 3 1/2 “ pressure-treated lumber, cut fifteen collar ties 5’-11 3/4” long according to the dimensions.

7.3 Using a 3/4 “ x 7 1/4 “ treated lumber, cut the ridge board to 20’ long according to the illustration below.

7.4 Connect the beams with 2x3” Phillips wood screws.
Assemble and Install Shed Doors

8.1 Build the door frames for the shed using 1 1/2 “ x 3 1/2 “ treated lumber and secure with 5” flat head Phillips wood screws. You will need two boards cut to 5'11 3/4” that will be the vertical girts and two boards cut to 2'3/4” that will be the horizontal girts.

8.2 Cut the 9/16” plywood sheet into two pieces measuring 2'-7 3/4” x 5'-11 3/4” for the doors according to the drawing.

8.3 Use 2 1/2 “ x 3/4 “ treated lumber for the door trim and fasten with 2” Phillips flat head wood screws. You will need two pieces cut to 2'-2 3/4” and two cut to 5'-11 3/4”.

8.4 Using 1/4 “ x 3/4 “ pressure-treated lumber, cut and install a starter course 2'-2 3/4” long.

8.5 Use 1/2 “ x 6” wood siding boards to cover the door and the illustration on this page as a reference.

8.6 Assemble siding shields with 2” galvanized nails.

8.7 Install three 3” door hinges using 6x1” Phillips wood screws. Finish the door installation by attaching 4” surface bolts and 6” door handles.
Window Installation for Left and Right Walls

This garden shed uses 2 windows built onsite.

9.1 Using 1 1/2” x 2 1/2” pressure-treated lumber, assemble the outer frame for the window as shown in the drawing below. You will need two boards cut to 3'-1" for the vertical girts and two boards cut to 3'-4" for the horizontal girts. You will also need vertical 2'-11 1/2" long and horizontal 3'-1" long supports using 3/4” x 1” lumber and to cut the indentations for the window hinges.

9.2 Use 1 1/2” x 1 1/2” pressure-treated material to make the inner frame and secure with 3” wood screws. You will need two boards cut to 2'-9 3/4" that for the vertical girts and two boards cut to 3'-3/4” for the horizontal girts. Mill a recess for the glass panes and for the hinges.

9.3 Use 1 1/4” x 1 1/2” treated wood to make the inner frame supports and secure with 3” wood screws. You will need two boards cut to 2'-9 3/4” and mill a recess for interconnection.

9.4 Prepare and install glass into inner frame groove and fasten it with window beading from four sides. Use 1/2” galvanized nails.

9.5 Install two hinges (3”) with 6x1” flat head wood screws and assemble the window. Install a lock on the inner side of the window.
Roof Sheathing Installation

10.1 You will need 300 square feet of the asphalt shingle roofing of your choice.

10.2 Add the metal drip edge to the fascias.

10.3 Cover the plywood with roofing felt or building paper.

10.4 Install asphalt shingle roofing using an industrial stapler or hammer and roofing nails.
Assemble and Install Window Shutters

This plan requires four handmade window shutters.

11.1 Assemble frames using 3/4 “ x 1 1/2 “ treated lumber and secure with 3” flat head wood screws. You will need one board cut to 1'-4 3/4"; two boards cut to 3'-3/4" for the vertical girts and two boards cut to 1'-7 3/4" for the horizontal girts.

11.2 Mill a recess along the vertical girts for the slats.

11.3 Use 1/4 “ x 1 1/2 “ pressure-treated lumber for the 24 slats cut to 1'-5 3/4" The shutters add architectural appeal to this garden shed.

11.4 Install two 3” door hinges using 6x1” wood screws.
Assemble and Install Pergolas

This garden shed plan uses two pergolas to accent the front door.

12.1 Assemble front frame using 1 1/2" x 1 1/2" treated lumber and secure with 3” flat head wood screws. You will need two boards cut to 6'-7" for the vertical girts and two boards cut to 1'-5 1/2" for the horizontal girts.

12.2 Assemble the back frame using 3/4" x 2 1/2” treated lumber and secure with 5” Phillips wood screws. You will need two boards cut to 6'-7" for the vertical girts and two boards cut to 1'-3 1/2" for the horizontal girts.

12.3 Use 3/4 " x 3/4 " pressure-treated lumber for the lattice. You will need thirty six boards cut to 2'-3/4".
Assemble and Install Roof Drainage System

13.1 Assemble the roof’s gutters on the front fascia board. You will need 5” half round gutters 18’-3” long; two end pieces with the outlet; six 45° elbows; two 3” pipes 6’ long; two joint connectors; and two end caps.

13.2 Fasten the round gutter to the fascia with the eleven round hangers.

13.3 Fasten the vertical pipe section with the four wall fasteners to the shed wall at even intervals.
Assemble and Install Door Ramp

14.1 Assemble the five door ramp frames from treated lumber and secure with 3 x 5” Phillips wood screws. For each frame you will need one 1 1/2” x 1 1/2” board cut to 1'-8”; one 1 1/2” x 2 1/2” board cut to 3'-3/4”; and one 1 1/2” x 3 1/2” board cut to 6 1/4”.

14.2 Secure all frames using one 1 1/2” x 2 1/2” board 5'-9” long and 3” flat head Phillip wood screws.

14.3 Cut the 9/16” plywood to 3'-3/4” x 5'-9” for the top and two sheets with to 9 1/4” x 2'-9 1/2” for the sides.

14.4 Assemble siding shields with 2” galvanized nails.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
